Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Customer Problem Statements

Customer Problem Statement template (Miro)

I am an EV Market Strategy Director (Emily Johnson). PS-1
I'm trying to decide which vehicle types and use cases to focus on.
But sales, prices and specifications sit in different columns.
Because there is no single view linking use case, price and performance.
Which makes me feel unsure and slow when planning the line-up.

I am an Automotive BI Manager (David Chen). PS-2
I'm trying to advise clients on manufacturing countries and drivetrains.
But I must compare countries, drivetrains and ratings by hand.
Because there is no interactive tool that brings them together.
Which makes me feel pressured and less confident in meetings.

I am a Sustainable Mobility Research Analyst (Dr. Sarah Williams). PS-3
I'm trying to understand how range, autonomy and battery type relate to satisfaction.
But these specifications are spread across thousands of records.
Because existing reports do not show them visually.
Which makes me feel frustrated and unable to give quick policy advice.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an EV Market Strategy Director (Emily Johnson)	decide which vehicle types and use cases to focus on	sales, prices and specifications sit in different columns	there is no single view linking use case, price and performance	unsure and slow when planning the line-up
PS-2	an Automotive BI Manager (David Chen)	advise clients on manufacturing countries and drivetrains	I must compare countries, drivetrains and ratings by hand	there is no interactive tool that brings them together	pressured and less confident in meetings
PS-3	a Sustainable Mobility Research Analyst (Dr. Sarah Williams)	understand how range, autonomy and battery type relate to satisfaction	these specifications are spread across thousands of records	existing reports do not show them visually	frustrated and unable to give quick policy advice
