Customer Journey Map

How an EV stakeholder (Emily Johnson, and in the same way David Chen and Dr. Sarah Williams) moves from a question to a decision with the EV Specs & Sales Explorer.

Phase of Journey	Stage 1: Question	Stage 2: Explore	Stage 3: Act
Actions – What does the customer do?	Receives a question about use cases, prices or specifications	Opens the EV Specs & Sales Explorer; uses country, drivetrain and use-case filters	Presents the Story; recommends segments, countries or drivetrains
Touchpoint – What part of the service do they interact with?	Email / meeting, brochures and spreadsheets	Spec KPIs, use case, price, rating and country charts	Tableau Story, shared link
Customer Thought – What is the customer thinking?	"How do I compare all these specs?"	"Family use leads sales; AWD gives more range."	"Now I can recommend with evidence."
Customer Feeling – What is the customer feeling?	Overloaded	Curious, in control	Confident
Process Ownership – Who is in the lead on this?	Business user	Analyst (Princy Malviya)	Business user
Opportunities – How can we improve this stage?	Keep specs and sales in one place	Add drill-down from category to model	Add price and sales forecasting

Journey map (visual):

Customer Journey Map – EV Specs & Sales Explorer User

Persona: Emily Johnson (also representing David Chen and Dr. Sarah Williams)

	1. Question	2. Explore	3. Act
Actions	Gets a question on use cases, prices or specs	Uses country, drivetrain and use-case filters	Shares the story and recommends actions
Touchpoints	Meeting / email, raw dataset	Spec KPIs, use case, price, rating and country charts	Tableau Story, Tableau Public link
Thoughts	"How do I compare all these specs?"	"Family use leads; buses cost 100× a scooter."	"Now I can advise with evidence."
Feelings	😟 Stressed	🙂 Interested	😊 Confident
Ownership	Business user	Analyst (Princy Malviya)	Business user
Opportunities	Keep data in one place	Add more filters and tooltips	Add forecasting in future
