Project Design Phase-I
Solution Architecture

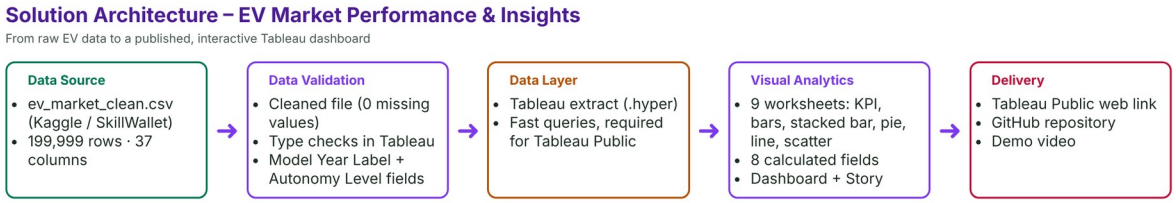

Date	01 November 2026
Team ID	NA
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technology Used
Data Source	Cleaned EV dataset ev_market_clean.csv (199,999 rows, 37 columns)	CSV (Kaggle / SkillWallet)
Data Preparation	Duplicates removed, missing values filled; type checks	Cleaned CSV + Tableau Data Source tab
Data Layer	Stores the data as a fast extract	Tableau extract (.hyper)

Analytics	8 calculated fields, SUM/AVG/COUNT aggregations, shared filters	Tableau Desktop
Visualisation	9 worksheets, dashboard with KPIs + 4 charts, Story	Tableau Desktop / Public
Delivery	Public dashboard link, files and documentation, demo video	Tableau Public, GitHub, Google Drive
